

CRYPTO ASSURED GOLD STANDARD

CAGS

CRYPTO ASSURED GOLD STANDARD (CAGS)

Lite Paper of CAGS

Updated: 2 August 2021

1. Introducing CAGS Token

CAGS is the first Crypto Gold DAO to be built on Binance Smart Chain.

CAGS token holders consist of many experienced investors, successful entrepreneurs, businessmen, Real Estate and properties investors, CEOs, CFOs, financial planners, forex and commodity investors in wealth management, financial and investment industries, internet and cryptocurrencies community from all over the globe.

The DAO will pool the funds into the DAO's treasury which will be used to purchase any digital assets or crypto assets or NFTs collection that are undervalued and participate in Staking, liquidity pools and any reliable Defi platform.

2. How CAGS works.

- CAGS is a Decentralised Autonomous Organisation (DAO) that will buy or sell digital assets, crypto assets and NFTs collection over time using the Binance Smart Chain.
- CAGS Token holders will govern the DAO's treasury, and decide on which digital assets or crypto assets or NFTs collection to buy or sell. The funds in the treasury will be used to buy the digital assets, crypto assets or NFTs collection over time. The treasury will be controlled by a multi-sig smart contract.
- The wallet will be controlled by the key representative members of the CAGS community who will use their best endeavors to act in accordance with the management decisions made of the CAGS Token holders.
- The majority of the signatories of the wallet will be the key representative members of the CAGS community. The key representative members of the CAGS community will first be selected based on the size of their CAGS Token ownership.
- Any future changes of the signatories will go through a governance proposal and be subject to a vote by the CAGS Token holders.
- CAGS Token holders will be entitled to vote on the management decisions on the fund held in the DAO wallet from time to time.

- CAGS is also a digital currency or digital money or digital gold that will be used as an alternative medium of exchange for any e commerce transactions, trade transactions and trade settlements.
- CAGS can be kept as a store of value.
- CAGS Token holders will have the opportunity to provide liquidity to earn a portion of transactional fees.

3. Why DAO?

We believe in the power of community. Building a portfolio of digital assets, crypto assets or NFTs collection together will be better if we have more great minds working towards similar goals. As a community, we will also gain more exposure, and be able to build a portfolio of higher quality of digital assets or crypto assets or NFTs collection, increasing our chances for achieving the value of one CAGS to potentially reach the price of one fine troy ounce of physical gold.

4. CAGS Tokenomics

Name: Crypto Assured Gold Standard

Ticker: CAGS

Total Supply: 1,000,000,000

DAO Reserve: 50% (500,000,000)

Development: 10% (100,000,000)

Future Marketing & Promotions: 14% (140,000,000)

Charities: 5% (50,000,000)

Initial Liquidity: 10% (100,000,000)

Pioneer Communities: 10% (100,000,000)

Airdrops for Early Supporters: 1% (10,000,000)

5. CAGS Release Schedule

- There is no IDO as this is a fair launch cryptocurrency.
- CAGS can be earned through providing liquidity to the liquidity pool.
- 79% of the total supply comprising of the DAO Reserve, Development, Marketing and Charities are locked initially.
- 10% of the total supply is distributed for initial liquidity.
- The remaining of 11% is reserved for the pioneer communities and early supporters.

Most of these tokens are locked and will be unlocked as the market prices of the token increases. Many blockchain projects use time-based unlocking which is potentially less secure. They may cause a less than optimal alignment between the incentives to acquire tokens/price with the need for security.

As each price milestone is passed, more tokens will be unlocked. The token locked will remain locked until the 7 days Simple Moving Average (SMA) of the CAGS crosses the following token strike price as stated in Table.

To mitigate this risk of rapid tranche unlocking, each time a new tranche is unlocked the SMA measure is reset to let the newly unlocked supply settle in the market.

To avoid supply shocks caused by sudden or violent volatility, only one new tranche can be unlocked at any given time.

- When the new tranche is unlocked, the pioneer community members who are still holding a big portion of tokens and actively contributed to the success of project can opt to exercise a portion or 100% of his/her locked share within 7 working days by paying the exercise price of the allocated locked token as specified in Table.
- The number of locked tokens entitled for each respective pioneer community member will be determined at the point of the new tranche release happens, subject to meeting the criteria set by the key representative members of the CAGS community.

Vesting Schedule of Active Pioneer Communities						
Total Active Communities Allocation :				10%	100,000,000	
Table A						
Strike Price \$	Current %	Total % Unlocked	Current No Unlock	Cumulative Token Unlocked	Total Supply Value	Exercise Price
0.001	5%	5%	5,000,000	5,000,000	1,000,000	Free
0.01	5%	10%	5,000,000	10,000,000	10,000,000	0.0010
0.02	5%	15%	5,000,000	15,000,000	20,000,000	0.0050
0.05	5%	20%	5,000,000	20,000,000	50,000,000	0.0100

0.9	5%	65%	5,000,000	65,000,000	900,000,000	0.100
1	5%	70%	5,000,000	70,000,000	1,000,000,000	0.100
1.1	5%	75%	5,000,000	75,000,000	1,100,000,000	0.100
1.2	5%	80%	5,000,000	80,000,000	1,200,000,000	0.100
1.3	5%	85%	5,000,000	85,000,000	1,300,000,000	0.100
1.4	5%	90%	5,000,000	90,000,000	1,400,000,000	0.100
1.5	5%	95%	5,000,000	95,000,000	1,500,000,000	0.100
1.6	5%	100%	5,000,000	100,000,000	1,600,000,000	0.100

RoadMap

Phase 1: Q3 2021

Launch Token Website cagolds.com

Begin Marketing on Social Media

Awareness and Education of potential of blockchain Metamask, Trust Wallet

Telegram group: t.me/cagolds

Twitter group : twitter.com/cagsGold

Facebook page: facebook.com/cagolds

Instagram : Instagram.com/cagoldstd

Medium

WhitePaper

COVID Recovery and Vaccination Charity Campaign

Official Launch Date: 8 am EST, 8 August 2021

Listing on PancakeSwap

Listing on BSCscan

Listed on Bogged Finance

Initial Liquidity Launch (8 am EST, 8 August 2021)

RoadMap

Phase 2: Q4 2021

Increase Telegram members, 10,000+

Increase Twitter Members, 10,000+

YouTube/Tik Tok Promotion

Continue Marketing on Social Medias

Continue Awareness and

Education of Blockchain and Wallets

Apply for CoinGecko

Apply for CoinMarket Cap

Collaborations and Partnerships

Articles /News Publishing

Influencer Partnerships for Marketing Push

Ambassadors by Countries

RoadMap

Phase 3: 2022

Apply for Listing at Centralised Exchange
Develop Partnership with Merchants and Businesses
Partnership with Effective Social Media
Voluntary Donation
Charity Partnership
Partnership with Venture Capital
Blockchain Development for DAO

Phase 4: 2023 - 2025

Testing and Launch of DAO
Mobile Apps Development
Crypto Debit Card
Selection and Purchase of Digital Assets
Compliance and Regulation
